(Photo credit: Future) An update made to PlayStation Direct on the PS4 Pro list shows that Sony will no longer sell the console to its store, leading to speculation that it may be preparing to discontinue the model. The PS4 Pro is currently marked as out of stock on the US PlayStation Direct website, but it has been noticed (via GamesRadar) that the list also states that there are currently no plans to refill this item in the future. The base model PS4 Slim is also listed as depleted, but in particular there is no indication that Sony does not plan to add more shares in the future. Naturally, this has led to speculation that Sony plans to discontinue the PS4 Pro now that the PS5 is launching and demand is high. Sony hasn't actually confirmed that it plans to discontinue the PS4 Pro, but it wouldn't be the biggest surprise if it did. Earlier this year, Microsoft discontinued the Xbox One X, the mid-generation equivalent of the PS4 Pro, along with the Xbox One S All-Digital Edition, while keeping the basic Xbox One S level on the shelves, calling it a natural step ahead of the launch of the next generation Xbox Series X and Xbox Series S.PS4 No? SIE CEO Jim Ryan has been clear in the past that while Sony felt a responsibility to serve the PS4 community for several years after the ps5 launch, he still believed in the idea of console generations; new and exclusive features that are not available for PS4. Exciting new features are usually a good way to encourage PS4 owners to make the leap to ps5. However, removing the in-between option on the PS4 Pro is likely to make it even easier for players to take advantage of the latest hardware. Given that the PS4 Pro and PS5 Digital Edition are listed on PlayStation Direct at \$399, the PS4 Pro is no longer a premium or value proposition. With the price of the PS5 Digital Edition, Sony is likely to serve those interested in upgrading to a lower-cost console without taking the risk that much of its player base will be left to rot in the previous generation. Sony may still continue to produce the PS4 Pro, but will sell the console through retailers, keeping its direct store limited to the base PS4 and PS5. However, given the high level of demand for ps5 at the moment, it would be very reasonable for Sony to put all its to get more parts of the last console there. If you're still struggling to get hold of the PS5, be sure to check out our guide on where to find the console in stock.
